Lambert's Retail-Ready Mixes

Jennifer Polanz

Lambert Peat Moss has introduced a line of Retail-Ready Mixes for a variety of traditional and specialty crops. “Understanding the unique needs of the vast variety of crops gardeners enjoy, we have worked hard to develop an equally vast selection of retail-ready potting mixes and soils for retailers to answer consumers’ desires,” says Gabe Lambert, president. “We have included in the collection hard-to-find soil mixes, such as those for orchids, African violets, succulents, and a horticultural wood charcoal and sphagnum moss that are unique to Lambert.”

Other options in the mixes include: Professional Organic All-Purpose Mix (OMRI listed), Professional Organic All-Purpose Potting Mix (OMRI listed), Professional Organic All-Purpose Garden Soil (OMRI listed), Seed and Cutting Mix, Hanging Basket & Planter Mix, Potting Mix with Moisture Crystals, Horticultural Perlite, Horticultural Vermiculite and more.
