Monrovia Offers Drought-Tolerant Guide

Jennifer Polanz

The western U.S. is facing hot and dry conditions, with many states experiencing drought. Monrovia now has a way to garden through that. The new “Low Water, High Beauty” guidebook offers landscape solutions for gardeners facing the challenge of dry conditions. The guide is full of water-smart tips, myth-busting information and, of course, a list of drought-tolerant plants.

“Creating a water-wise landscape is important to many gardeners,” says Katie Tamony, chief marketing officer at Monrovia. “We developed this guide to help Western gardeners make thoughtful choices, but the ideas and plant selections can help anyone facing dry conditions make the most of their landscapes.”

Open your device's camera and hover it over the QR code to check out the guidebook. **GP**
