ThinkPlants Releases 23-24 Catalog

Ellen C. Wells

ThinkPlants recently released its 2023-24 New Varieties Catalog. First, who or what is ThinkPlants? ThinkPlants is a cooperation of 16 plant breeders and allied horticultural experts with the aim of bringing plants to market together under one umbrella in a seamlessly connected supply chain and marketing effort. I should also mention this group has a specialization in perennials. And this new catalog of theirs has more than 40 new introductions.

Some of the new perennial introductions for 2023-24 include:

- Agastache Pink Pearl from Terra Nova Nurseries, available as URCs out of Danziger's Guatemala facilities
- Echinacea Prairie Blaze from Syngenta Flowers, the first OP seed

echinacea available in novelty colors

- Bigleaf Hydrangea My Beautiful Diva in both blue and pink—these are available as pre-finished liners from Creekside Greenhouses in Canada
- Phygellus Colorburst Series from Monrovia has four colors, a compact habit and comes to you as URCs out of Danziger's Guatemala facilities
- Salvia Pink Nebula from Danziger, a companion to their recent big-bloomed Dark Matter introduction, is available as URCs out of Danziger's Guatemala facilities

You can find all these plants and more in the new catalog. Visit thinkplants.com for the details. **GP**
