Forage's Mother's Day Kit

Jennifer Polanz

While at the Global Produce & Floral Show last year, I saw a unique kit introduced for 2025 under OASIS' Forage brand— it's a Mother's Day Kit for DIY flower arranging. This could be positioned with cut flowers (or even with perennials and shrubs that produce great cuts). There's a display available that can include other Forage products, too.

The Mother's Day Kit includes two plant-based containers, Forage foam brick, mossing pins, scissors, decorative wire and Forage Flower Fuel. Visit oasisforageproducts.com for more details. Heck, I might ask for this in May, since I just planted a new peony and a couple of roses last fall! **GP**
