Aquascape Inc.'s New Pumps & Kits

Jennifer Polanz

People are looking to create an oasis in their own backyard and Aquascape has introduced products that can help retailers satisfy the demand for a water feature. The company says its new SLD Adjustable Flow Pond pump is the only asynchronous, solids-handling, adjustable flow, WiFi connected and smart device-controlled pump in the water garden industry.

“The asynchronous motor provides more reliability and longevity than ever, plus it has smart control capabilities, allowing the pump to be controlled from anywhere at any time using your smartphone or tablet,” says Dave Kelly, vice president of product development.

The company also is offering Deluxe Pond and Pondless Waterfall Kits that included all the components needed for customers to add a pond or waterfall to their oasis. Deluxe kits include new WiFi-compatible pumps and color-changing lights, which also can be controlled with a device. All deluxe kits include faux driftwood, an automatic dosing system and in the pond kit they've included the Pond Powerhead. Find out more at aquascapeinc.com. GP
