PVG Catalog Out Now

Ellen C. Wells

Pleasant View Gardens' new 2023 Retailer/Landscaper Guide has something for every gardener. The catalog has 120 pages filled with lots and lots of flowering plants—everything you as a garden retailer will need to fill your benches from early spring through fall. Since they're a Proven Winners partner, they have a ton of product that's not only heavily promoted, but also heavily in demand. And it doesn't stop at flowers! PVG carries the Proven Winners Proven Harvest line of herbs, vegetables and fruits, too.

Of course they also have all the new varieties debuting from PW's Proven Accents—68 of those are ColorSmart Perennials and Shrubs! Inside the guide you'll also find 128 recipes (14 of them new) that are specifically selected for their wow factor and performance. You can access the flipbook or request a hard copy at pwpvg.com. **GP**
