Indoor AgTech Moves to the Midwest

Jennifer Polanz

Previously in New York City, the 7th annual Indoor AgTech Innovation Summit moves in 2024 to Chicago. The meeting of the agtech minds will take place June 24 to 25 at the Marriott Marquis Chicago.

Last year, more than 500 industry members came together for discussions and to hear panels and speakers talk about the future of indoor production. Watch the website at indooragtech.com for more details as they emerge and add it to your travel calendar.
